WE ARE

It is the task of the Unit to develop policies and concrete legislative, regulatory and advocacy measures to improve the functioning of EU wholesale and retail electricity and gas markets, to lower the cost for consumers, enable better integration of renewables into the energy system, to minimise the need for subsidies and increase security of supply through connecting markets across borders and through demand response and other flexibility measures.

We also undertake the assessment of national energy policies and legislation as to their compatibility with EU law. Thus, we focus specifically on the progress of reforms of national energy rules, including the setting up and operation of new infrastructure, in these regions.
