Grade range: AST1-3

WE ARE

The Publications Office of the European Union is the official provider of publishing services to all EU institutions, bodies, and agencies. As such, it is the central point of access to EU law, and also to publications, data, research results, procurement notices and other official information. The Publications Office therefore plays a central role in informing the public about what the EU does and means for them, and in unlocking the power of data.

Its mission is to support EU policies as a centre of excellence for data, information and knowledge management, and to ensure that this broad range of information is available to the public as accessible and reusable data to facilitate transparency, economic activity and the diffusion of knowledge.

The Publications Office publishes in all the official languages of the European Union and continuously adapts its services to a rapidly evolving technological environment (e.g. data services, cloud computing, machine learning and artificial intelligence).

Within Directorate C 'Access to and Reuse of Public Information', Unit C.3 'TED and EU Public Procurement' is responsible for managing and developing the TED website, which is the online version of the Supplement to the Official Journal of the European Union (OJ S). The unit ensures that public procurement notices from EU Member States, EU institutions, EEA countries, candidate countries, international organisations and non-EU countries are published and accessible. It also contributes to the implementation of the European data strategy by supporting the integration of TED data into the EU public procurement data space, thereby enhancing transparency and data reusability across the EU.

Within the unit, the 'Standards & Support' sector is in charge of the development, maintenance and evolution of eProcurement standards such as the eProcurement Ontology, the European Single Procurement Document (ESPD) and eForms — the European standard for eNotification. The sector also provides technology support and expertise to the other sectors of the unit, and coordinates IT

operations, deployments, quality assurance, security screening and liaison with technical teams across the Commission, contractors and external stakeholders.

WE PROPOSE

We propose a challenging job in the IT project coordination team of Unit C.3 'TED and EU Public Procurement'.

The successful candidate will take charge of the day-to-day coordination of a small team of IT project managers and DevSecOps specialists (4-5 people), working under the supervision of the head of sector. The role is operational and hands-on: ensuring that the IT project managers are properly supported and aligned, that developments across projects are progressing as planned, and that potential conflicts or bottlenecks are identified and addressed early.

More specifically, the successful candidate will:

- oversee the work of IT project managers and DevSecOps staff, ensuring proper backlog management, clear priorities and timely delivery across all projects;
- maintain a comprehensive view of ongoing developments, upcoming deliveries and planned work across the unit's information systems, in order to detect and resolve conflicting priorities or resource constraints;
- coordinate with business owners, contractors and the OP operations team to ensure smooth collaboration throughout the project lifecycle;
- maintain and continuously improve the processes and pipelines for IT project delivery, deployment and acceptance testing, ensuring they are properly documented and followed;
- develop a solid working knowledge of the unit's systems, software architecture and infrastructure, sufficient to understand what the team is working on, identify when things go wrong and take appropriate action;
- ensure continuity of institutional technical knowledge, particularly during staff rotations and contract renewals, by maintaining up-to-date documentation and guiding incoming team members;
- review and validate software deliverables, including conducting functional and integration tests when needed;
- contribute to the management of contractual relations with service providers;
- report to the hierarchy on the progress of IT activities and flag issues as they arise.

WE LOOK FOR

We are looking for a hands-on, organised and proactive person who is comfortable coordinating the work of a small technical team on a daily basis.

Essential:

- experience in IT project coordination or a similar operational coordination role;
- sufficient technical understanding of IT systems, infrastructure and deployment processes to be able to assess the work of the team and identify issues;
- ability to take ownership of operational follow-up, monitoring progress and ensuring that the team delivers on its commitments;
- good organisational and prioritisation skills;
- ability in problem solving and analytical thinking;
- rigour and attention to detail, particularly regarding documentation and knowledge management;
- very good communication and drafting skills in English (C1 level), both in writing and orally.

Desirable:

- experience with DevSecOps practices and CI/CD pipelines;
- knowledge of IT project management methodologies and tools (e.g. PM2);
